

Required Report: Required - Public Distribution

Date: January 07, 2022

Report Number: EZ2021-0013

Report Name: Food and Agricultural Import Regulations and Standards Country Report

Country: Czech Republic

Post: Prague

Report Category: FAIRS Annual Country Report

Prepared By: Jana Fischer

Approved By: Kirsten Luxbacher

Report Highlights:

This report provides information on the laws and regulations for food, import rules for food, and contact information in the Czech Republic. It is recommended to read the EU-28 Food and Agricultural Import Regulations and Standards, because the Czech Republic, a member of the European Union, follows the EU directives and regulations. The following sections include updates: I., II., III., IV., V., and VIII. since last report. Please note notification requirements for importers of certain foodstuffs of plant origin in Section VI.

Disclaimer:

This report was prepared by the USDA/Foreign Agricultural Service in Prague, Czech Republic, for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. **FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.**

THIS REPORT CONTAINS ASSESSMENTS OF COMMODITY AND TRADE ISSUES MADE BY USDA STAFF AND NOT NECESSARILY STATEMENTS OF OFFICIAL U.S. GOVERNMENT POLICY

Table of Contents

Executive Summary	3
Section I. Food Laws:	3
Food Act	4
Veterinary Act	5
Section II. Labeling Requirements:	6
Alcoholic Beverages	8
Other Specific Labeling Requirements	8
Health and Nutrition Claims	8
Genetically Modified Foods	8
Organic Products	9
Plant-based meat/dairy alternatives	9
Section III. Packaging and Container Regulations:	9
Section IV. Food Additive Regulations:	10
Section V. Pesticides and Contaminants:	10
Section VI. Other Requirements, Regulations, and Registration Measures:	11
Section VII. Other Specific Standards	12
Novel Foods	12
Special Use Foods	12
Section VIII. Trademarks, Brand Names and Intellectual Property Rights:	13
Section IX. Import Procedures:	13
Section X. Trade Facilitation:	14
Appendix I. Government Regulatory Agency Contacts:	15
Appendix II. Other Import Specialist Contacts:	17

Executive Summary

Czech Republic as a member of the European Union (EU) follows all EU directives, regulations, and obligations. This report focuses on food laws in force in the Czech Republic that cover areas which are not yet EU-harmonized. EU Regulations are explained in the Food and Agricultural Import Regulations and Standards (FAIRS) report produced by the U.S. Mission to the EU in Brussels, Belgium, and referenced throughout this report as [EU FAIRS Report](#). It is available at the [FAS GAIN Report Database](#).

Section I. Food Laws:

In May 2004, the Czech Republic became a member of the European Union. All EU directives apply. Suppliers from the United States must be familiar with EU regulations and directives and Czech food laws for products and topics not harmonized at the EU level.

Any food industry area that is not regulated by the EU (non-harmonized), is regulated individually by member states. However, this regulation cannot restrict free movement of goods. This report provides a summary of Czech food legislation. EU Regulations are explained in the EU [Food and Agricultural Import Regulations and Standards](#) (FAIRS) report prepared by the U.S. Mission to the EU in Brussels, Belgium, available at [GAIN \(usda.gov\)](#) or at <https://www.usda-eu.org/trade-with-the-eu/eu-import-rules/fairs-reports/>.

All EU regulations and directives can be obtained at the following web page:

<http://eur-lex.europa.eu/en/index.htm>.

The Czech Republic follows the EU food safety approach based on risk analysis and traceability (of both inputs and outputs), with the aim of guaranteeing food safety and consumer protection. The Czech Ministry of Agriculture published a document “[Food Safety and Nutrition Strategy 2030](#)” that provides information on the system and implementation of food safety and nutrition policy in the Czech Republic. It is accessible on-line, in English, at the bottom of this site:

<https://www.bezpecnostpotravin.cz/strategie-bezpecnosti-potravin-do-roku-2030-posileni-bezpecnosti-i-kontrolniho-systemu-vzdelavani-spotrebitelu-a-otazky-vyzivy.aspx>.

For questions, clarification, or copies of the following regulations, please contact the FAS office in Prague, Czech Republic, agberlin@usda.gov or call (011-420) 257-022-000.

The most important Czech national acts and regulations regarding food are as follows:

Food Act

The Food Act 110/1997 as amended by legislative Acts: 166/1999, 306/2000, 119/2000, 146/2002, 131/2003, 274/2003, 94/2004, 316/2004, 558/2004, 392/2005, 444/2005, 229/2006, 296/2007, 120/2008, 224/2008, 227/2009, 281/2009, 375/2011, 279/2013, 128/2014, 138/2014, 139/2014, 180/2016, 26/2017, 183/2017, 302/2017, 277/2019, and 174/2021. The amendment 277/2019 comes into force on January 1, 2020, and implements the EU Regulation (EU) 2017/625 of the European Parliament and of the Council of March 15, 2017 on official controls and other official activities performed to ensure the application of food and feed law, rules on animal health and welfare, plant health and plant protection products.

The Food Act defines requirements related to:

- hygiene and sanitary condition of food production
- food, additives, foods for special diet, irradiation of food
- classification of slaughter animals
- packaging of food
- labeling of food
- placing of food on the market
- transportation of food and tobacco products
- the system of official control of food
- penalty assessment for non-compliance

Imported food products essentially have the same status as domestically produced products according to Food Act 110/1997, its amendments, and implementing decrees.

The most important national laws and regulations regarding food include:

- 69/2016 (meat, meat preparations, fish, other aquatic organisms and preparations from them, egg and egg preparations)
- 211/2019 (carcasses and animals intended for slaughter)
- 397/2016 (milk, dairy products, frozen creams, edible fats, and oils) - amended by 247/2019.
- 329/1997 (starch, legumes, and oil seeds) amended by 418/2000 and 399/2013
- 330/1997 (tea, coffee, and coffee substitutes) amended by 91/2000 and 78/2003
- 398//2016 (spices, edible salt, dehydrated products, condiments, cold sauces, dressings, and mustard)
- 157/2003 (fresh fruits and vegetables, processed fruits and vegetables, nuts, mushrooms, and potatoes) amended by 650/2004, 291/2010 and 153/2013 – as of January 1, 2022, it will be repealed and replaced by Decree 397/2021 (canned fruits and canned vegetables, nuts, mushrooms, potatoes and derived products thereof, and bananas)

- 18/20 (cereals, grains, pasta, and bakery products)
- 76/2003 (sweeteners, honey, cocoa, and chocolate) amended by 43/2005 and 148/2015
- 248/2018 (non-alcoholic beverages and concentrates for the preparation of non-alcoholic beverages, fruit wines, other wines and mead, beer, potable alcohol, spirit drinks and other alcoholic beverages, brewed vinegar, and yeast). For more details please see a notification detail [here](#).
- 275/2004 (packed water) amended by 404/2006
- 366/2005 (certain frozen foods)
- 58/2018 (requirements for food supplements and food enrichment) This [decree](#) (in Czech language, includes a table of Latin plant names) provides conditions and limits for the use of certain plants and substances, as well as lists of plants and substances, which are prohibited for use in food and food supplements.
- 261/2016 (tobacco products), 82/2019 (labeling tobacco)
- 417/2016 (some types of food labeling)
- 231/2016 (collection, preparation, and test methods for control samples of foodstuffs and tobacco products) amended by 78/2018

Decrees of the Ministry of Health connected to the Food Act include:

- 296/1997 (epidemiological risks)
- 475/2002 (mushroom classification)
- 54/2004 (foodstuffs intended for special nutrition) amended by 402/2006, 473/2006, 157/2008, 35/2012, 46/2014, 39/2018, and 80/2021
- 133/2004 (food irradiation)
- 299/2012 (setting limit for erucic acid – at maximum 5 percent)
- 37/2017 (electronic cigarettes, refill containers and herbal products for smoking)

Veterinary Act

Primary veterinary laws and decrees connected to the Food Act by regulating conditions for veterinary control, animal diseases, and foodstuff safety include:

- Act no. 166/1999 (veterinary Act) amended by 29/2000, 154/2000, 102/2001, 120/2002, 76/2002, 320/2002, 131/2003, 316/2004, 444/2005, 48/2006, 186/2006, 124/2008, 182/2008, 298/2009, 291/2009, 223/2009, 227/2009, 281/2009, 308/2011, 18/2012, 359/2012, 279/2013, 64/2014, 139/2014, 264/2014, 250/2014, 126/2016, 243/2016, 183/2017, 58/2018, 302/2017, 368/2019, 238/2020, 543/2020, 36/2021 (comes into effect on January 1, 2022), 261/2021 (comes into effect on February 1, 2022), and 284/2021 (comes into effect on January 1, 2022 and July 1, 2023)

- Decree no. 291/2003 (regulations on feedstuffs for animals and their products intended for human consumption) amended by 232/2005, 375/2006, 129/2009, 51/2012, and 22/2020
- Decree no. 94/2010 amended by 291/2012 (animal processing)
- Decree no. 289/2007 (veterinary and hygienic requirements for animal products) amended by 61/2009, 11/2015, 65/2019, and 181/2020
- Decree no. 128/2009 (veterinary and hygienic requirements for food companies) amended by 191/2013 and 445/2017
- Act no. 78/2004 (GMO) amended by 346/2005, 124/2008, 227/2009, 281/2009, 18/2012 (Chapter 34), 279/2013, 243/2016, 371/2016, 183/2017, and 261/2021 coming into effect on February 1, 2022
- Decree no. 209/2004 (GMO) amended by 86/2006, 29/2010, 372/2016, and 341/2019. Please note that the following products sourced in the United States and imported into the EU must originate from an EU-approved U.S. establishment: red meat, meat products, farmed and wild game meat, ratites, milk and milk products, seafood, bovine embryos and semen, porcine and equine semen, gelatin, and animal casings.

For veterinary certificates and information related to trade with commodities subject to veterinary controls, please see the FAIRS Export Certificate Report for the Czech Republic and the EU-28 available at <https://gain.fas.usda.gov/#/search>.

Section II. Labeling Requirements:

EU labeling requirements and instructions on how to comply with the EU system are provided on our USEU website at <http://www.usda-eu.org/trade-with-the-eu/eu-import-rules/eu-labeling-requirements/>.

In the Czech Republic, decree no. 417/2016 provides general rules for some types of food labeling. Complete guidance, available only in the Czech language, can be found on the [food safety website](#), provided by the Ministry of Agriculture. The key principles and requirements are the following:

Consumer labels on food packages must be understandable, easily visible, permanent (i.e., not erasable), and not covered by other information or easily removable.

All labels on products intended for a Czech consumer must be in the Czech language. The standard U.S. label is not sufficient for being placed on the Czech market. Stick-on labels in Czech are widely used on imported products; the text on the original and Czech translation must be identical.

The Czech Agriculture and Food Inspection Authority (CAFIA) and the State Veterinary Administration (SVA) are the authorities for enforcing labeling requirements. CAFIA considers the

general appearance of the label and confirms that it is not in any way misleading. A Czech label must be on the product in order to pass customs clearance, in other words before it enters the market. The label does not have to be adhered to the product before shipping.

Food samples do not have to be labeled. Products for the food sector must be labeled like products for the end consumer. Their packaging, however, must only include the name of the product, expiration date, quality category, and irradiation information. Other information from the label on products inside this package must be in the documentation.

Information that must appear on the label includes the following:

- Name of the product with the information about the product category and its preparation
- Producer and importer information with addresses
- Quantity – liquid products in milliliters, centiliters, or liters and solid products in grams or kilograms
- Expiration date. Form of the expiration date information varies according to the product. Some products (such as fresh fruit and vegetables) do not require an expiration date
- Storage instructions (such as temperature, exposure to daylight, etc.)
- Usage instructions
- List of ingredients listed in the order of their amount in the product
- Lot number for identification tracking
- Information on food additives, enzymes, flavors, fragrances, and/or ionization

If the product is packaged at a different location than where it is processed, it must be labeled with the name of the packaging company and address, name of the product, its quantity, additives, country of origin, and other requirements mentioned in special laws.

Decree no. 54/2004 (amended by decrees 402/2006, 473/2006, 157/2008, 35/2012, 46/2014, 39/2018, and 80/2021) gives regulations on labeling of special foods (diets, baby food, food for sportsmen etc.). These foods must follow the same regulations as other foods regarding labeling and include some additional information as mentioned in 54/2004 – specifics in processing if those cause the food's characteristics, protein origin (if this protein is mentioned in contents), category, and other specifications.

Tobacco products' labeling is specified under decree 82/2019, which defines requirements for size, placement, and custom look of information and requirements.

Decree no. 58/2018 (repealing decree no. 225/2008 amended by decree 352/2009) defines food supplements - such as vitamins and minerals - they must be labeled with the words "*doplňěk stravy*" (food supplement) visibly on the packaging. The label must also carry information on the character, origin, amount of content, the recommended daily intake, and warnings against overdose.

Alcoholic Beverages

Products must comply with the food safety and traceability requirements as set by Czech and EU legislation (Regulation (EC) no. 178/2002 and Czech Decree no. 248/2018 and the Food Act no. 110/1997 with later amendments listed in Section I.).

For alcoholic beverages containing more than 1.2 percent alcohol by volume, the alcohol content must be indicated by a figure with no more than one decimal place. It will be followed by the symbol ‘% vol.’ and may be preceded by the word ‘alcohol’ or the abbreviation ‘alc.’ Tolerances vary by beverage type.

Net quantity, allergens, name or business name and address of the food business operator, country of origin or place of provenance, instructions for use where necessary, and date of minimum durability or the ‘use by’ date (for beverages less than 10% vol. of alcohol) are required.

National Decree no. 248/2018 introduced new categories and definitions of beverages, and further specifies mead labeling requirements.

Health warnings are not required.

Other Specific Labeling Requirements

Health and Nutrition Claims

Regarding health and nutrition claims, the Czech Republic follows EU regulations. They can be found, along with a list of permitted nutrition claims and their conditions of use here:

http://ec.europa.eu/food/safety/labelling_nutrition/claims/register/public/?event=register.home.

Genetically Modified Foods

Genetically modified foods (i.e., “GMOs”, genetically engineered (GE) products) are to follow EU regulations. Foods containing GE ingredients must be labeled with the words, “*Tento produkt/výrobek obsahuje geneticky modifikovaný/ou/é* (name of the organism),” and include the name of the product, name of the GE organism(s), conditions of managing the GE product, and information on safe use. Only GE traits listed and approved in the EU GMO register are allowed to enter the market. Example in English (label must be in Czech language though): “*Product contains soybean oil from genetically modified soybeans.*”

For more information on the treatment of biotech foods in the Czech Republic as well as the GMO free/non GMO labeling scheme, please see our report [Agricultural Biotechnology Annual Prague Czech Republic 10-20-2021](#).

Organic Products

For regulations and details regarding organic products and market please see [Czech Republic Organic Product Brief Report](#). Please note that in Czech, a term “product of ecological agriculture” is used. Products are marked with “Bio.”

Plant-based meat/dairy alternatives

The Czech Republic follows the EU regulatory framework. There are no country specific labeling requirements.

Section III. Packaging and Container Regulations:

All foods entering the market must be packed appropriately. The packaging must protect the product from damage and contamination and prevent replacement or substitution of the product without changing or penetrating the original packaging. The packaging itself must not affect the content in any way. Containers and packages must suit not only the content but also any other materials and objects that come into direct contact with the foods. This area is regulated via Decree no. 38/2001 (amended by 186/2003, 207/2006, 551/2006, 271/2008, 386/2008, 127/2009, 111/2011).

Foods that are not packed must be labeled on the transportation/manipulation containers with the above-mentioned information and this information must also be visibly placed while the product is being offered to the final consumer.

Packaging Sustainability Measures

The rules for packaging waste management are determined by the EU Directive 94/62/EC on packaging and packaging waste, which is transposed into Czech legislation by Act no. 477/2001 coll. on Packaging.

This Act applies to the management of all packaging which is placed on the market or into circulation in the Czech Republic, except for containers used in road, railway, or air transport or in sea or inland

waterway transportation pursuant to international conventions which are binding for the Czech Republic.

The basic obligations of this law are the fulfillment of the concentration limits regarding hazardous substances contained in packaging, ensuring the take back of packaging waste and its recovery in accordance with the objectives of the Directive. These targets are expressed as the percentage amount of packaging waste which must be recycled or recovered. The other provision of this Act is the definition of the basic rules for the returnable and reusable packaging management.

Czech legislation related to packaging is accessible on the website of the Czech Ministry of Environment in English at https://www.mzp.cz/en/packaging_legislation

- [Act No. 477/2001 Coll. on Packaging](#) (PDF, 234 kB)
- [Decree No. 116/2002 Coll. on marking returnable packaging](#) (PDF, 14 kB)
- [Decree No. 641/2004 Coll.](#) on the scope and manner of keeping records of packaging and reporting the data from these records (PDF, 20 kB)
- [Government order No. 111/2002 Coll.](#) specifying the amount of the deposit on selected types of returnable packaging (PDF, 257 kB)
- [Annexes - Decree No. 641/2004 Coll.](#) (XLS, 64 kB)

Section IV. Food Additive Regulations:

The EU regulations 1332/2008, 1333/2008 and 1334/2008 regulate the usage food enzymes, food additives, and flavorings. A list of approved food additives and conditions of their usage is mentioned in Regulation (EC) 1333/2008.

Section V. Pesticides and Contaminants:

Several contaminants such as lead, mercury, and arsenic are regulated via EU regulation 1881/2006. Pesticides are regulated via EU regulation 396/2005.

At the national level, the Ministry of Health is the competent authority overseeing the impact of pesticide residues on human health. The Ministry of Agriculture is responsible for plant protection products, including the transposition and implementation of related legislation and its supervision. The assessment of a plant protection product, including its use for the protection of public health, is performed by the Ministry of Health based on an expert opinion prepared by the National Institute of Public Health.

In 2021, the Ministry of Health prepared the “Multi-Annual Control Plan for Pesticide Residues 2022 – 2024,” accessible in English at

https://eagri.cz/public/web/file/686098/VKPlan_pesticity_2022_2024_EN.pdf

The above-mentioned document includes the following information:

1. Introduction
 2. Legal basis
 - 2.1 Community level
 - 2.2 National level
 3. Definitions and Terminology
 4. Competent state administration authorities
 - 4.1 Central government authorities
 - 4.2 State supervisory bodies
 5. Control program
 - 5.1 Scope of the program
 - 5.2 Criteria used for program processing
 - 5.2.1 Selection of commodities, statistics
 - 5.2.2 Number of samples taken
 - 5.2.3 Analyzed pesticide residues
 6. Official laboratories
 7. Conclusion
- Annex 1 – Requirements on analysis of pesticide residues in products of plant origin
Annex 2 – Requirements on analysis of pesticide residues in products of animal origin

A list of approved pesticides may be found on the Central Institute for Supervising and Testing in Agriculture’s website – <http://eagri.cz/public/web/en/ukzuz/portal/> (Central Institute for Supervising and Testing in Agriculture – contact is provided in the list of contacts in Appendix I).

Section VI. Other Requirements, Regulations, and Registration Measures:

In the Czech Republic, food business operators are required to inform relevant supervisory authorities on the reception of certain foodstuffs originating from another EU member state or a third country. The process of registration and notification for the importation of these foodstuffs is described (including a list of the certain foodstuffs) in English at the following website of the Czech Agricultural and Food

Inspection Authority: <http://www.szpi.gov.cz/en/article/notification-of-selected-foodstuffs-pursuant-to-decree-no-172-2015-coll.aspx>.

Section VII. Other Specific Standards

Novel Foods

Novel foods are regulated at the EU level. EU Regulation (EU) 2015/2283 of the European Parliament and of the Council defines novel foods as, “food not used for human consumption to a significant degree before 15 May 1997 and falling under at least one of the following categories,”

- food with a new or intentionally modified molecular structure, where that structure was not used as, or in, a food within the Union before May 15, 1997;
- food used exclusively in food supplements within the Union before 15 May 1997, where it is intended to be used in foods other than food supplements as defined in point (a) of Article 2 of EU Directive 2002/46/EC.

The authorization process is described at the website of the European Commission:

https://ec.europa.eu/food/safety/novel_food_en.

In the Czech Republic, novel foods fall under the responsibility of the Ministry of Agriculture and controls are conducted by the Czech Agriculture and Food Inspection Authority. The Ministry of Agriculture’s Food Safety Department has a dedicated e-mail address for inquiries related to the novel foods: novelfoods@mze.cz.

Special Use Foods

Importers of all special diet foods from third countries that are not mentioned in a specific law or regulation are obliged to contact the Ministry of Health. The product label must be in Czech language before the product can be introduced on the market. If the product has been introduced elsewhere in the EU previously, then the approving EU member state office must be mentioned as well. The Ministry may request expert review and confirmation on the efficiency and safety of the product. The Ministry also retains the right to ban any product from the market that does not meet regulatory requirements. Food products must be protected from damage and depreciation whilst being transported and only appropriate transportation should be used.

Section VIII. Trademarks, Brand Names and Intellectual Property

Rights:

Trademarks and brand names are protected by the following acts:

- 14/1993 on protection of industrial property (amended by 417/2004, 250/2014)
- 441/2003 on trademarks (amended by 501/2004, 221/2006, 296/2007, 303/2013, 183/2017, 196/2017, 286/2018, and 261/2021 that comes into effect on February 1, 2022)
- 452/2001 on protection of geographical location indication (amended by 131/2003, 501/2004, 221/2006, 375/2007, 256/2011, 196/2017, 277/2019 coming into effect on January 1, 2022, and 261/2021 coming into effect on February 1, 2022)
- 206/2000 on protection of biotechnology inventions
- 408/2000 on protection of rights to plant varieties (amended by 147/2002, 149/2002, 219/2003, 377/2005, 554/2005, 444/2005, 184/2008, 227/2009, 281/2009, 279/2013, 183/2017, and 334/2020). In general, Czech agricultural associations and non-governmental organizations (NGOs) support the International Union for the Protection of New Varieties of Plants ([UPOV](#)) plant certificate system rather than the patent system.

Trademarks can be registered at the Industrial Property Institute (contact information is provided in the list of contacts in Appendix I).

Section IX. Import Procedures:

Products can be cleared through customs on entry directly into the Czech Republic or indirectly through another EU member state (e.g., countries with seaports like Germany or the Netherlands).

Notification duty for importers of selected foodstuffs pursuant to Decree No. 172/2015 Coll.:

Decree No. 172/2015 Coll. (repealing decree No. 320/2014 Coll., amended by 141/2017) on notification obligations of the food recipient in the place of destination related to certain sorts of foodstuffs entered into force on August 1, 2015. The Decree is the implementing regulation for the Act on Foodstuffs (Act No. 110/1997 Coll.). Section 3d, paragraph 3 of this Act requires food business operators to inform relevant supervisory authorities on the reception of a selected sort of foodstuffs originating in another EU member state or a third country.

The Decree applies only to those foodstuffs which are destined for the territory of the Czech Republic in situations where the goods are received, handled, or manipulated for the first time in the Czech

Republic. This means that it concerns all parties that are the first recipients or handlers of foodstuffs of plant origin including parties that import or directly sell foodstuffs of plant origin including various types of mobile shops.

The food business operator shall notify the foodstuffs in the place of destination.

Further detailed information is available on the CAFIA website:

<http://www.szpi.gov.cz/en/article/notification-of-selected-foodstuffs-pursuant-to-decree-no-172-2015-coll.aspx>.

Only GMOs listed in the EU approved register may be imported through a “Designated Point of Entry” (DPE) in the Czech Republic – Vaclav Havel Airport Prague, CU Praha Ruzyně, Aviatická 12/1048, 160 08 Praha. Importers must inform the Customs Administration and CAFIA or the Central Institute for Supervising and Testing in Agriculture (CISTA).

Requirements for the import of products of veterinary origin may be found in English on the web page of the State Veterinary Administration (SVA):

<https://en.svscr.cz/trade-with-vet-commodities/general-information/>. It is highly recommended by the SVA officers to contact them prior importing any veterinary commodities for current requirements, as they are often subject to change. SVA’s contact information is listed in Appendix I.

Section X. Trade Facilitation:

Goods from the third countries typically enter the Czech Republic through larger EU member states that have access to ports. For more information, please refer to the [Food and Agricultural Import Regulations and Standards Country Report of the European Union](#).

Appendix I. Government Regulatory Agency Contacts:

Ministry of Agriculture

Karolina Bartosova (Director of Foreign Trade Cooperation Department)
